Why Digital Preservation

What is at Stake ?

"Information is the oxygen of the modern age. It seeps through the walls topped by barbed wire, it wafts across the electrified borders"

Ronald Reagan

"A popular government without popular information or the means of acquiring it, is but a prologue to a farce, or a tragedy, or perhaps both"

James Madison

Challenges of Digital Preservation

Building a **Digital Preservation** System

Challenge I – Digital Preservation Definition

http://bcservice.net/2011/01/network-disaster-recovery-pt-3/

"Digital preservation combines policies, strategies and actions to ensure access to reformatted and born digital content regardless of the challenges of media failure and technological change.

The goal of digital preservation is the accurate rendering of authenticated content over time"

ALA (American Library Association)

Challenge I – Digital Preservation Definition

•Digital preservation is the management of digital information over time. Preservation of digital information is widely considered to require more constant and ongoing attention than preservation of other media. ...

en.wikipedia.org/wiki/Digital_preservation

•The long-term maintenance and upgrade of digital files on digital storage medium hosting.collectionsaustralia.net/capture/course/glossary.html

•The process of ensuring that a digital object is accessible over the long term. ibeaction.com ibeaction.com ibeaction.com ibeaction.com

•Refers to the series of managed activities necessary to ensure continued access to digital materials for as long as necessary.

Challenge I – Digital Preservation Definition

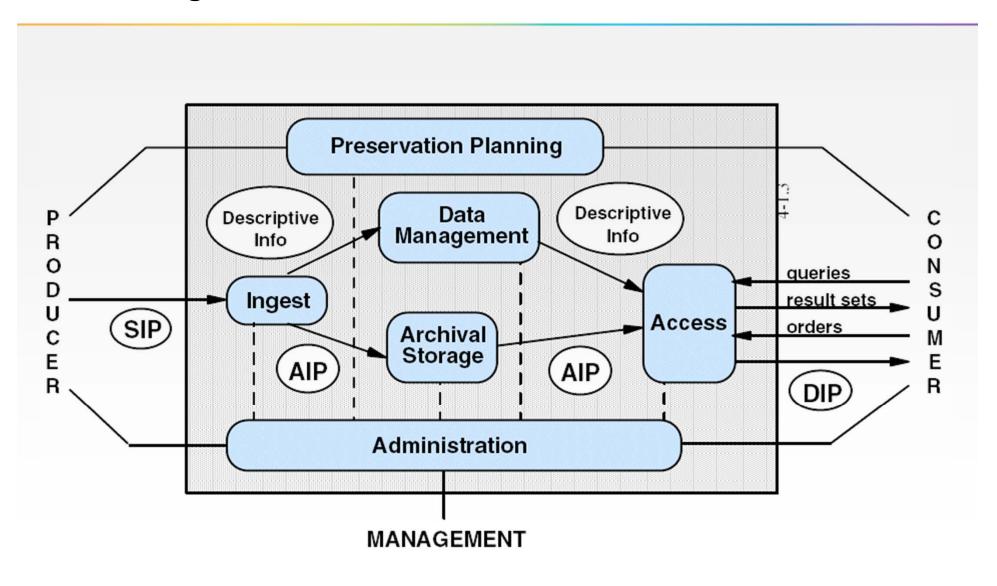

Challenge II – Data Model

- Support structure and metadata for long term digital preservation
- Variety of formats
- Variety of institution types
- Conform to standards and best practices

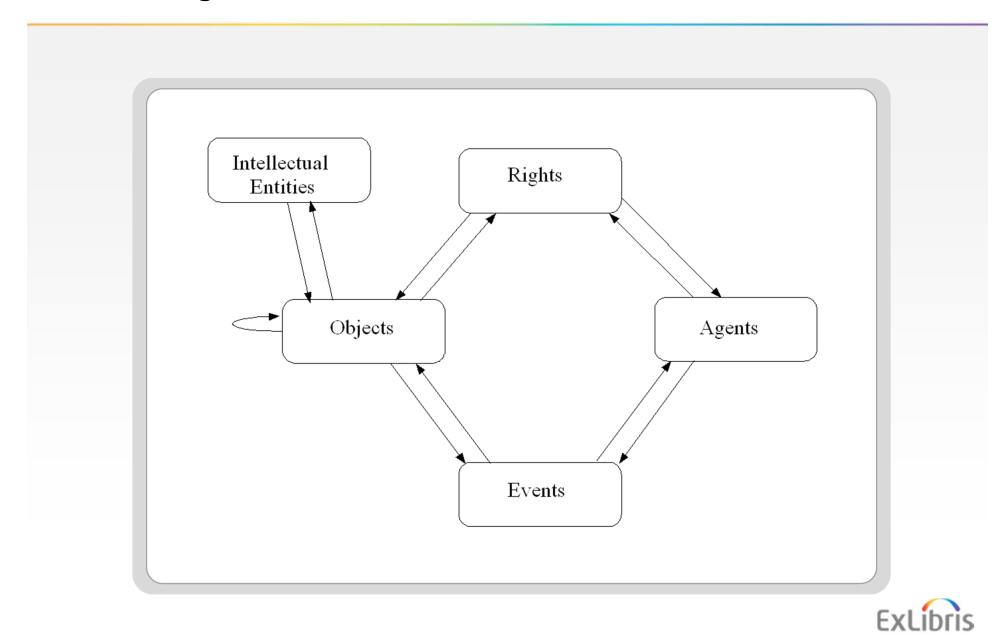

Challenge II – Data Model

Challenge II – Data Model

Challenge III – Characterization

http://www.flickr.com/photos/sreejithk2000/2385193167/

Challenge III – Characterization

- A framework around the different tools including:
 - A technical analyst workbench to handle the different issues
 - Rule based decision making to automate the process
 - Use the local format library to define rules of what to use on each format

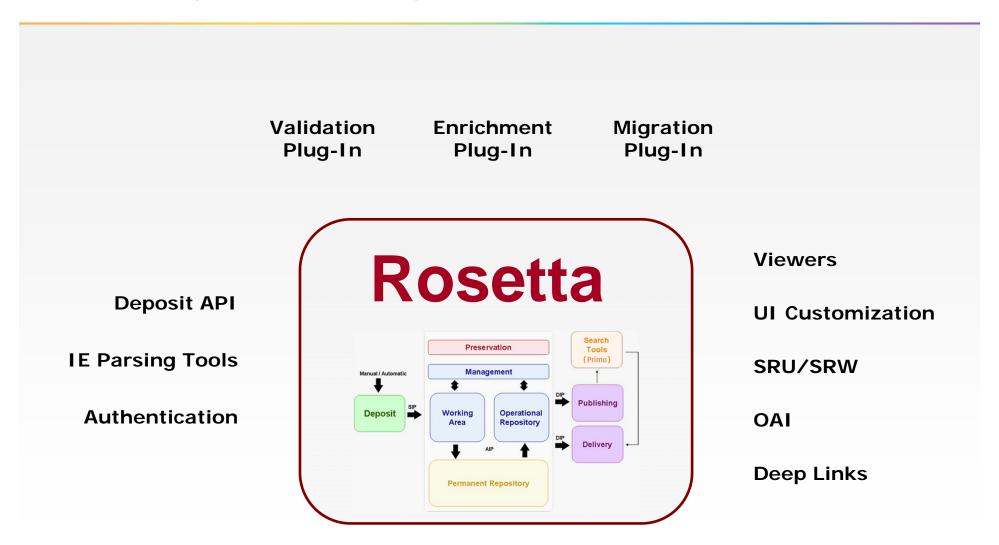

Challenge IV – Existing Infrastructure

- Institutions have infrastructure in place
- Not creating yet another system
- Integrate with existing environment.

Challenge IV – Existing Infrastructure

Challenge V – The System as a Bottleneck

http://www.psdgraphics.com/psd/green-exit-sign-psd/

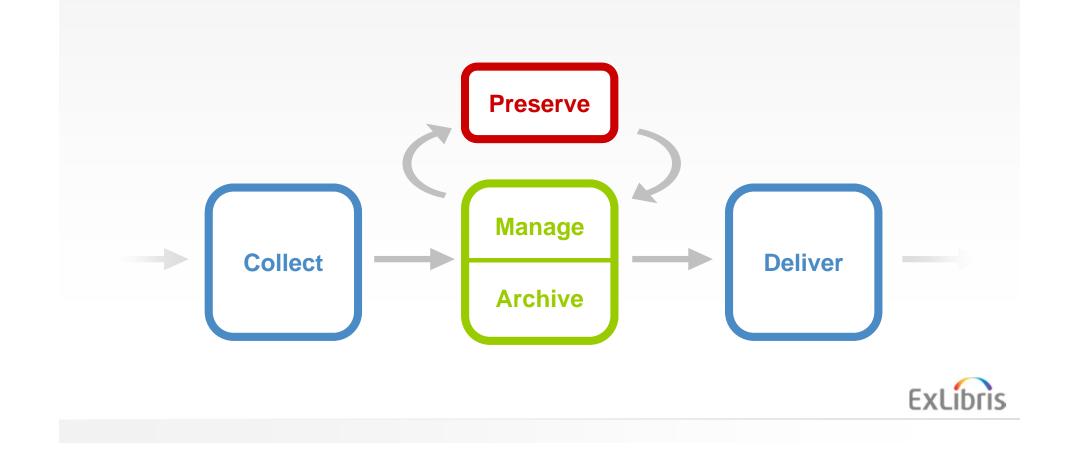

Challenge V – The System as a Bottleneck

- All preservation worthy information is stored on disk
- Storage abstraction later
- Storage is open and based on standards
- Information can be restored into Rosetta or into another system

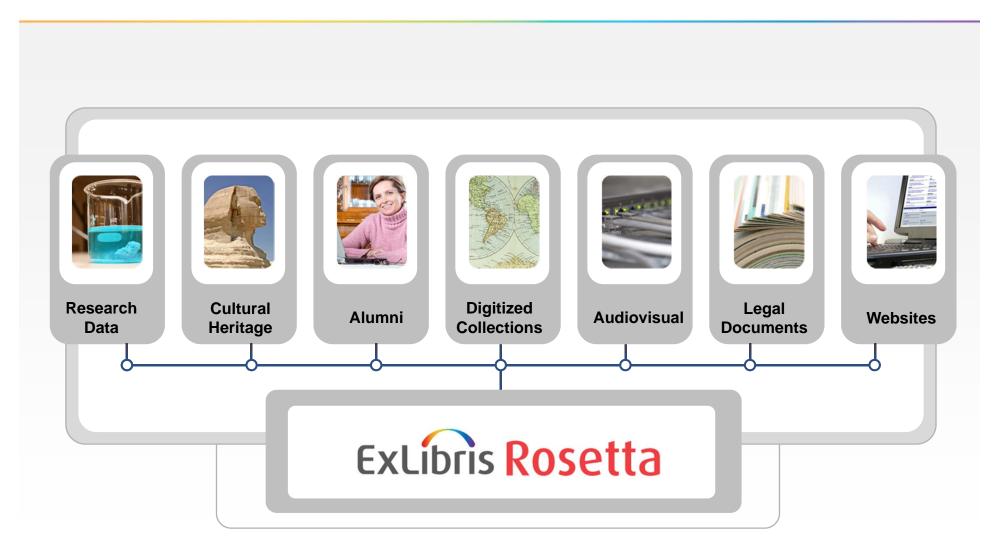

Ex Libris Rosetta

Ex Libris Rosetta helps institutions in collecting, managing, archiving and preserving their digital collections, ensuring its data integrity and access over time

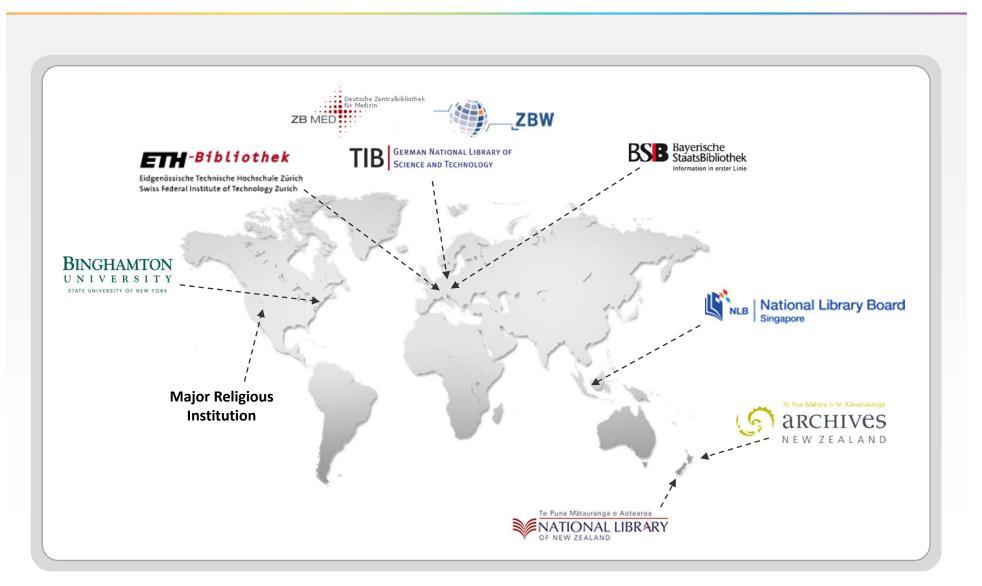

What Can Rosetta Do For You?

Our Customers Around the World

Conclusions

- Digital materials are easily created and on a large scale
- Awareness for digital preservation is growing
- Challenges are well defined

Rosetta

- These challenges represent a small proportion of the requirements and objectives of the Rosetta digital preservation solution
- Complete preservation solution
- Scalable, flexible and extensible
